

Fake News & Science: A Call to Action

Samuel R. Putnam, University of Florida

What are you even
doing?

Lies spread faster than the truth

To understand how false news spreads, Vosoughi et al. used a data set of rumor cascades on Twitter from 2006 to 2017. About 126,000 rumors were spread by ~3 million people. False news reached more people than the truth; the top 1% of false news cascades diffused to between 1000 and 100,000 people, whereas the truth rarely diffused to more than 1000 people. Falsehood also diffused faster than the truth. The degree of novelty and the emotional reactions of recipients may be responsible for the differences observed.

S. Vosoughi, D. Roy, and S. Aral, "The spread of true and false news online," *Science*, vol. 359, no. 6380, pp. 1146–1151, Mar. 2018 [Online]. Available: <http://dx.doi.org/10.1126/science.aap9559>

**SATIRE OR PARODY**

No intention to cause harm but has potential to fool

**MISLEADING CONTENT**

Misleading use of information to frame an issue or individual

**IMPOSTER CONTENT**

When genuine sources are impersonated

**FABRICATED CONTENT**

New content is 100% false, designed to deceive and do harm

**FALSE CONNECTION**

When headlines, visuals or captions don't support the content

**FALSE CONTEXT**

When genuine content is shared with false contextual information

**MANIPULATED CONTENT**

When genuine information or imagery is manipulated to deceive

The science of fake news

“What interventions might be effective at stemming the flow and influence of fake news? We identify two categories of interventions:

(i) those aimed at empowering individuals to evaluate the fake news they encounter, and

(ii) structural changes aimed at preventing exposure of individuals to fake news in the first instance.”

D. M. J. Lazer et al., “The science of fake news,” *Science*, vol. 359, no. 6380, pp. 1094–1096, Mar. 2018 [Online]. Available: <http://dx.doi.org/10.1126/science.aao2998>
